LUMPKIN COLLEGE OF BUSINESS & TECHNOLOGY

Lumpkin College is focused on the engagement & development of business & technology students, providing them the needed resources to become exceptional leaders. With support, we can create a rich learning environment that provides our students the knowledge, skills and real-world experience they need to excel in today's dynamic business and technological workplace. Your contributions enable us to continue supporting our students and faculty by providing them with cutting-edge resources to offer innovative programs and exceptional growth opportunities. Thank you for supporting Lumpkin College!

PREMIER PARTNERS PROGRAM

Industry Partner sponsorship at the **Premier Level** is an invaluable way to connect with Lumpkin College students. Premier partners engage with Lumpkin College administrators and faculty to discuss curriculum initiatives that will benefit both students and the industry. Special topics courses can be developed and offered in areas of particular interest to the company, and company representatives are able to provide numerous guest lectures in those unique courses. Current examples of this collaboration are the two new "special topics" courses available during 2024 that are related specifically to mainframe technology. Levi, Ray & Shoup, Inc. will be providing guest presentations and instruction throughout the courses and may also supply special projects for students to gain practical experience.

Premier partners are able to interact with students at a private event promoted by Lumpkin College. These types of events are informative to students in many ways, and they allow Premier partners to provide information about their companies, including internship and job opportunities. Finally, Premier partners are recognized in person at the Lumpkin College annual awards banquet held in April; this is just one way that we show our deep appreciation for their support of our students.
